Python Programming
Indentation Error

Mostafa S. Ibrahim
Teaching, Training and Coaching since more than a decade!

Artificial Intelligence & Computer Vision Researcher
PhD from Simon Fraser University - Canada
Bachelor / Msc from Cairo University - Egypt
Ex-(Software Engineer / ICPC World Finalist)

Indentation Error

- Indentation refers to **the spaces** at the beginning of a code line.
- Python uses indentation to indicate a block of code.
  - Later we will learn if statement and for loops.
  - Indentation Error is more probable
- For now, all your code starts from the begin of the line

```
2    # this line is ok
3    x = 'hello'
4
5    # this line has 2 extra spaces in begin
6    # Running: IndentationError: unexpected indent
7      y = 'why'
8
9
```
